Docket No.: 0933-0148P

AMENDMENTS TO THE CLAIMS

1-24. (Cancelled).

25. (Previously Presented) Saccharomyces cerevisiae strains selected from the group

consisting of H1791 (VTT C-98298, DSM 12213), H1795 (VTT C-98300, DSM 12214), H1803

(VTT C-98302, DSM 12215), H2193 (VTT C-99317, DSM 12722), H2195 (VTT C-99320,

DSM 12723) and H2222 (VTT C-99322, DSM 12724).

26. (Previously Presented) Schizosaccharomyces pombe strains selected from the group

consisting of H2369 (VTT C-99323, DSM 12725) and H2370 (VTT C-99324, DSM 12726).

27-42. (Cancelled).

43. (Currently Amended) A method for increasing yield of ethanol produced during a

microbial production process comprising the steps of:

(a) transforming a host microorganism selected from the group consisting of

Saccharomyces spp. and Schizosaccharomyces spp. with one or more polynucleotides encoding

an enzyme to produce a transformed microorganism, wherein said enzyme is selected from the

group consisting of NAD-dependent glutamate dehydrogenase, and malic enzyme, wherein the

host microorganism carries the genes for xylose reductase and xylitol dehydrogenase enzymes

and

GMM/CAM/py

2

(b) culturing the transformed microorganism to produce ethanol,

thereby increasing the yield of ethanol when compared to the yield of ethanol when

produced in a microorganism that has not been transformed according to step (a).

44. (Cancelled).

45. (Previously Presented) The method of claim 43, wherein ethanol is produced in an

amount that is at least 5 % higher than the amount produced in a microorganism that has not

been transformed according to step (a).

46. (Previously Presented) The method of claim 43, wherein the ethanol is produced

from carbohydrate.

47-68. (Cancelled).

69. (Previously Presented) The method of claim 46, wherein said carbohydrate is at least

one selected from the group consisting of glucose and xylose.

70. (Previously Presented) The method of claim 43, wherein the host microorganism is

3

Saccharomyces cerevisiae.

GMM/CAM/py

Docket No.: 0933-0148P

Application No. 09/423,554 Amendment dated February 27, 2006 After Final Office Action of November 30, 2005 Docket No.: 0933-0148P

- 71. (Previously Presented) The method of claim 43, wherein the host microorganism is *Schizosaccharomyces pombe*.
 - 72. (Cancelled).
- 73. (Currently Amended) The method of <u>claim 43</u> elaim 72, wherein the host microorganism <u>carries</u> is a yeast strain earrying, in addition, the gene for xylulose kinase.
